**100%
NEW MATERIALS
FOR BAGS**

**100%
BAGS ON
A MISSION**

How can we turn plastic waste into something positive?
Over 100 million plastic bottles are used every single day! Globally only 18% of our plastic is being recycled. Annually 5 to 13 million tonnes of plastic end up as plastic soup.

100% recycled bottles

Recycle Bags wants to reduce the huge plastic waste mountain. The best way to reduce plastic soup is to stop single use plastic and recycle plastic waste. We recycle 3 up to 32 used PET bottles for each new bag. Bags which are proven to have the lowest environmental impact. Strong, reusable & handy for daily use and the best alternative for single use plastic bags.

100% new materials for bags

We clean used plastic bottles, chop them into small pieces and make new yarns out of it. Our bags are 100% made from this rPET yarns. Striving to be the frontrunner in using recycled materials we do not stop with the outside fabric only. Thus, also the lining fabric, as well as the zippers and the webbing trimmings are made from 100% recycled PET. In this way we are able to increase the number of recycled bottles per bag to a maximum of even 32 bottles!

100% bags on a mission

Independent research shows that bags from rPET have the lowest environmental impact. Our bags have a long-life span, are strong & handy for daily use, they replace the need for single use plastic bags and are themselves recyclable. And above all, we recycle as many bottles as possible into 1 single bag. We want to take recycling to the max!

We fit your requirements

We can offer you a wide range of options to fit your wishes. From 50 pcs we can deliver screenprinted bags from stock. Starting from 500 pcs we can fully customize bags in different colors and printing options. We can even ship you FOB China for larger orders. Because we also care about working conditions and the environment, our factories are well certified. Our local office in China continuously checks these conditions and assures the quality of our products as well as prompt delivery.

A backpack, duffel, sports bag, or something in between? The RB Splitpack is your practical and durable companion for many purposes. The main zipper cuts the bag right into two compartments. Easy to separate for example clean clothes from your laundry, or separate your wet stuff, dirty shoes or toiletry. Both compartments are closed with mesh and zipper. With the rock-solid backpack straps and handles, the bag can be carried around 1 or 2 shoulders or can be carried as a regular handbag. The bag is cabin-size proof. For this bag we recycle 32 bottles for the fabric, zippers and webbing!

The RB Backpack is a stylish and practical backpack with an easy roll-top closing. The large opening enables quick and easy searching for your things like books, documents, (sports) clothes or any other stuff you need on the way. You can place your laptop or tablet in the special laptop compartment, protected by the padded back panel. Small items can be stored in the zipper pocket on the side. Made from high quality 2-tone recycled fabric, as well as zippers and trimmings from rPET, this backpack will for sure make happy users!
